

JOHN DEERE OPENER BLADES

GET
THEM
NOW!

Available in store!

An opener blade that provides superior durability and precise furrow opening. Just what you need for consistent seed-to-soil contact come planting season.

RIVETS - Larger rivets for increased strength and overall durability.

BLADE - Heat-treated carbon-boron steel to maintain a sharp edge.

BEARING - Double row ball bearing with triple lip seal on both sides of the blade, prolonging bearing life.

HUB - Improved manufacturing process for more consistent fit to bearing and blade.

OPENER BLADE - AA105716* *REQUIRES NEW SEED TUBE/CARTRIDGE GUARD
